

# MyEMC PORTAL

## A Few Exciting New Features

Waiting for your test results is a thing of the past. Within days you will have immediate access to your test results with your provider's feedback.

Get your health information on the go with the mobile app, HealtheLife.

Securely talk about your health with your FHP provider or healthcare team through your portal. Ask questions and request to schedule or view appointments.

Request prescription refills on the go or from your home for refillable medications through your FHP provider.

**We have made it easier for you to find your health information through our new My FMC Portal.**

If you utilize or are signing up for our current patient portal, My FMC Link, you will need to sign up for our new patient portal on April 1. My FMC Link provides patients and their families with secure and confidential access to their personal health information online for services occurring **before April 1, 2018**. You can access any medical information obtained **on or after April 1, 2018** through the new Patient Portal.

Please be assured that Fairfield Medical Center would never delete or discard any of your medical history. Your medical history will continue to be available through our Medical Records department. Because it is a new system, online access through the new patient portal only displays health information occurring on or after April 1, 2018.

**On or after April 1 you can provide your email address to a Fairfield Medical Center team member during your next visit. You will receive a secure email invitation to sign up for My FMC Portal.**
