### **FAIRFIELD MEDICAL CENTER EMPLOYEES OF THE QUARTER**

**LANCASTER, Ohio (December 6, 2007)** – Fairfield Medical Center recognizes and congratulates Suzi McClaskey, Tammy Baker, and Dee Flowers for being chosen by their peers as the Employees of the Quarter. Suzi McClaskey is the Employee of the Quarter for the Patient Services division, Tammy Baker is the Employee of the Quarter for the CEO/CFO/Medical Affairs Division, and Dee Flowers is the Employee of the Quarter for the Support Services Division.

Suzi McClaskey is a resident of Lancaster and began her career at the Center in 1993. She works in the Case Management Department as a Utilization Review Coordinator. Suzi is an exceptional case manager and representative for FMC. She is an excellent patient advocate, ensuring that patients' concerns are communicated to the nursing staff and physicians in an effective manner. Other case managers and nursing staff seek her out to assist with problem solving and difficult patient care situations. Suzi's co-workers appreciate her considerate and kind approach when they have personal problems and her flexibility in arranging staffing schedules to ensure staff time off. She is well respected and a kind person. Congratulations Suzi!

Tammy Baker began her career at the Center in 2003, and is a resident of Lancaster. Tammy works in the Marketing Department as the Women's and Men's Health Coordinator. She is a great asset to the Marketing Department, providing support and helpful information to employees and people in our community. She is always available to give her assistance and does a tremendous job teaching classes for employees as well as the public. She is a friendly and courteous person that truly deserves such recognition. Congratulations Tammy!

Dee Flowers began her career at the Center in 1985 and is a resident of Lancaster. Dee works in the Cardiovascular Services Department as an Advanced Practice Nurse. She goes above and beyond each day providing Cardiovascular Services to people in need. Dee gives incredible care and is very competent. As an example, Dee was working with another patient's chart at the nurses' station when a stat EKG was ordered on another patient. Dee was eager to help with reading the EKG and talked with the doctor regarding the results. Dee's assistance with this urgent matter was greatly appreciated. The fact that she dropped what she was doing to help out demonstrates her dedication.
