NEW TRANQUILITY GARDEN AT FAIRFIELD MEDICAL CENTER

LANCASTER, Ohio (September 11, 2007) – The new tranquility garden at Fairfield Medical Center is open for patients, visitors, physicians, and employees to use as a relaxing and peaceful getaway. It is located on the second floor close to the Maternity department, and is the former smoking patio. Thanks to the Fairfield Medical Center Foundation, this vision has become a reality. Money donated from generous people in our community is one of the reasons this is such a sacred and heartwarming area to visit. Sandy Maholm, Foundation Manager, commented, "I am very pleased that we were able to transform the smoking patio into an area that can promote a healthier environment for people to enjoy. We met our objective and many thanks to the people of our community who made it possible."

Although the garden is not completely finished, it is open for people to enjoy the nice weather and plant life. It is a great environment for people to rest, reflect and relax. Such a rooftop garden area also creates a peaceful and serene setting for meditation and retreat from the stresses of everyday life. In our fast-paced world, we need to find ways to slow down, to think and de-stress, to just breathe, and let go of tension. So, make it a point to visit the tranquility garden during your next visit at Fairfield Medical Center.
