### **64-SLICE CT SCANNER OPEN HOUSE**

**LANCASTER, Ohio (June 1, 2007)** – On May 29<sup>th</sup>, Fairfield Medical Center unveiled the new 64-slice CT Scanner in the X-ray Department during the Lancaster Fairfield County Chamber of Commerce Business After Hours Event. Approximately 60 business leaders and community members were in attendance for this unveiling.

Fairfield Medical Center is moving into the next generation of technology with this new CT Scanner, allowing for 64 individual pictures to be taken of a particular area of the body. Cardiac, vessel and whole body scans are just some of the tests that this new scanner can perform. This innovative CT Scanner also allows for new exams to be available, along with improvements to some of the existing tests. Overall, patients can be rest assured they are receiving state of the art care from the X-ray Department at Fairfield Medical Center.
