FMC EWING SQUARE INFUSION CLINIC NAMED #2 IN THE REGION FOR ADMINISTRATION OF RECLAST

LANCASTER, Ohio (May 14, 2009) – Ewing Square Specialty Services Infusion Therapy Clinic recently received the honor of being named number two in the three state region (Ohio, Michigan, and Pennsylvania) for administration of Reclast.

Reclast is an annual intravenous (IV) dose, along with daily calcium and vitamin D, that helps strengthen your bones and protect them from fracture for an entire year. This prescribed treatment is the only FDA-approved, once-a-year treatment for postmenopausal osteoporosis. Robin Thompson, Infusion Clinic Registered Nurse, commented, "It is very convenient for our patients to receive this treatment right here in Lancaster, and we were honored to be recognized for giving Reclast effectively and efficiently at our facility. In fact, no other osteoporosis treatment is approved to help protect from fracture in more places, including hip, spine, and even other bones."

Treatment is given at Ewing Square in the Infusion Therapy Clinic, located at 1253 East Main Street, Lancaster. It takes at least 15 minutes and is given by a registered nurse. For more information or questions, please call the Infusion Therapy Clinic at (740) 687-8805.
