

Project Spotlight - Cardiovascular Services

Excellence in cardiovascular care is a cornerstone of Fairfield Medical Center's lasting legacy. Across specialties, our comprehensive services combine cutting-edge technology and treatment options with personalized care because our patients deserve the best outcomes.

*In our mission to serve hearts across the region, we are committed to expanding and advancing **cardiovascular care** at Fairfield Medical Center. With your help, we can create brighter futures, fuller lives and healthier hearts.*

FMC offers a wide array of heart and vascular services, and we're determined to continue growing:

- General and preventive cardiology
- Interventional cardiology
- Electrophysiology
- Structural heart program
- Cardiothoracic surgery
- Vascular surgery
- Dialysis access
- Wound care
- Clinics and rehabilitation (cardiopulmonary rehab, CHF clinic, coumadin and arrhythmia clinic)

Our Impact

In 2022, the FMC Foundation helped at least 56 Cardiac Rehab uninsured or under-insured patients pay for more than 1,000 sessions of rehab. Rehab session co-pays can range from \$15-\$50 per session for a total of 36 sessions. Without the FMC Foundation's fund, patients would have to pay \$540 to \$1,800 for their rehab in co-pays alone. Our goal with the fund is to help patients focus on recovering and getting better and not how they are going to pay their rehab bill.

Making a Difference

On April 28, members of Community Heart Watch proudly cut the ribbon on a new 14' mobile training unit. Community Heart Watch is a collaborative effort of Fairfield Medical Center, EMS, businesses, schools and medical providers in Fairfield, Hocking and Perry Counties that is focused on saving lives from cardiac arrest through education, training and improving access to lifesaving AEDs. The new unit was fully funded through donations from corporate and individual sponsors totaling almost \$20,000. Corporate sponsors included Fairfield Federal, Park National Bank, Friendly Bremen Banking Center, Rotary Club of Lancaster, Stebelton Snider and LifeLink AED Specialists.

2022 By the Numbers

Community Heart Watch

AEDs placed regionally - **36 placed**
CPR taught regionally - **4,500 trained**
CHW is a regional effort to improve survival through awareness, training and access to AEDs.

Support & Management

Cardio Rehab - **360 patients**
In addition to cardiopulmonary rehab, FMC also offers a CHF clinic, coumadin and arrhythmia clinic.

Specialty Surgical Procedures

TAVR, EP, Valve & CABG - **890 patients**
(TAVR) A minimally invasive approach to valve replacement.
(EP) Electrophysiology services treat complex arrhythmias.

Emergency STEMI Procedure

ST-Elevation Myocardial Infarction - **156 patients**
Our STEMI team is on-call at all hours to help save lives from this dangerous type of heart attack caused by a 100% blockage.

Cardiac Catheterization (Cath Lab)

Heart Cath - **1,643 patients**
These include diagnostic, elective and emergency procedures.

On Aug. 31, 2022, the FMC Foundation presented Fairfield Healthcare Professionals a check for funds to purchase a new advanced EKG unit for the FHP Family Medicine of Millersport location. With the help of our regional sponsors, donors and event participants, we are able to offer comprehensive cardiac care for patients in the Millersport community.
