# Welcome to Graduate Medical Education at Fairfield Medical Center

Fairfield Medical Center is a vibrant 222-bed healthcare organization focused on providing exceptional experiences to everyone it serves. We are in a great location, approximately 30 miles southeast of Columbus and approximately 30 miles northeast of the scenic Hocking Hills area. Drawing on a multiple county market area, the medical center has a diverse patient demographic that is optimal for residency training. Our Graduate Medical Education Resource Center provides a dedicated area for residents and students to train. The center includes lecture and study facilities, sophisticated audio, visual and video conference technology, osteopathic manipulative therapy, and other hands-on learning directed by FMC physician instructors.

FMC offers primary care residency programs in Family and Internal Medicine. Family Medicine and Internal Medicine are currently ACGME accredited, which means that residents graduating from our programs will be eligible for ACGME fellowships and their specialty board certification exams. FMC maintains a strong training affiliation with Ohio University Heritage College of Osteopathic Medicine and participates in the statewide Clinical Divisions that promote collaboration among multiple OUHCOM affiliated residency programs. Originally accredited by the American Osteopathic Association, our Family Medicine Residency Program began in 2010 and our Internal Medicine Residency Program in 2012. Both programs have achieved continued accreditation, as well as continued Osteopathic Recognition under ACGME and maintain a continued commitment to training osteopathic principles and practice.

We encourage those seeking balanced education opportunities in medicine to explore the opportunities at FMC. Our program provides informative community and clinical experiences for first and second year medical students and excellent hands-on clinical and didactic training for third year and fourth year medical students. Our osteopathic-focused residency training programs offer minimal competition for procedural exposure and a breadth of encountered pathology to provide relevant practical training experience. We have an exceptional teaching staff committed to providing not only the best in patient care, but also outstanding learning opportunities in an environment with a comprehensive curriculum. Our faculty and staff offer a wealth of pertinent and up-to-date information during rotations, lectures, OMM and SIM training sessions and in-clinic settings. As newer programs, our Family Medicine and Internal Medicine Residencies provide unique opportunities for physician trainees who want to help cultivate their clinical education experience. Innovative curricula and resources, such as new state-of-the-art skills labs, support our education programs. With engaged faculty members and low physician-to-resident ratios, trainees will gain a valuable hands-on learning experience and be better prepared for their board certification exams upon completion of their residency at FMC.

FMC is known throughout Central Ohio for offering a wide variety of educational opportunities. We are an excellent place to further your training in medicine.

Challenger – Annual  
Board Exam – Once  
OMT Board Certification – Once  
AOA membership (DOs) – Annual

AMA membership (MDs) – Annual  
NCH jacket (FM PGY1 only) – Once  
OMM Board review (PGY3 FM only) – Once  
AAFP membership (FM) – Annual  
Epocrates – Annual  
Up-to-date – Annual  
Critical Care conference (IM Interns) – Once  
POCUS Curriculum Fee  
AFMRD (FM residents) – Annual

### Fairfield Medical Center

Fairfield Medical Center, founded in 1916, provides primary and emergent care to local residents. FMC has been expanding its off-campus footprint, with additional locations in Millersport, Amanda, New Lexington, Canal Winchester and Logan. In addition, its River Valley Campus opened in 2019 offering sports medicine and other out patient services.

### Glass City

The home of the Fortune 500 company Anchor Hocking was once a bustling center of industry and employment. At its peak following World War II, Lancaster's hometown company was the world's largest maker of glassware and employed more than 5,000 town residents.

### Destination Downtown Lancaster

Downtown Lancaster has a variety of events that bring community and visitors together to celebrate in the beautiful historic district. Whether you are inspired by art, theater, music, or the changing of seasons and the holidays that go with them, downtown Lancaster has a bit of everything!

### Fairfield County

With 162,898 people, Fairfield County is the 19th most populated county in Ohio. White-collar workers make up 78.19% of the working population, while blue-collar employees account for 21.81%. Of the workforce, there are 8.01% employed as entrepreneurs, 67.29% employed in private companies, and 16.72% working in governmental institutions.

### Lancaster, Ohio Population

Lancaster has a population of 41,111. It is also the county seat of Fairfield County. Lancaster is currently growing at a rate of 0.43% annually and its population has increased by 1.28% since the most recent census, which recorded a population of 40,590 in 2020.

Breweries in Fairfield County: Double Edge Brewing Company, Outerbelt Brewing

Ohio University – Lancaster: <https://www.ohio.edu/lancaster/>

Approximately 30 minutes away from Columbus International Airport

Fairfield Medical Center also serves parts of Hocking, Pickaway, Perry & Licking counties

### Local Area Schools

Ohio has 1.7 million students, in partnership with more than 240,000 educators across the state. The Ohio Department of Education dedicated to fulfilling the vision established Ohio's strategic plan for education. The vision is, "In Ohio, each child is challenged to discover and learn, prepared to pursue a fulfilling post-high school path and empowered to become a resilient, lifelong learner who contributes to society."

## Experience Advanced Heart Care

Feeling tired and out of breath is now a thing of the past for historian Jack Campbell following minimally invasive heart surgery at Fairfield Medical Center. Jack, who has aortic valve disease, opted to receive the TAVR (transcatheter aortic valve replacement) procedure to replace the weakened valve in his heart. His recovery included 12 weeks of cardiac rehabilitation at FMC, which helped him lose weight and rebuild the strength he needs to continue leading the active lifestyle he loves.

*"I can't explain how quickly this procedure restored my health," Jack said. "I didn't know how bad I felt until I felt better, and the difference is incredible."*

Scan the QR code to read more about Jack's story.

### TAVR & the Structural Heart Program at FMC

Unlike open-heart surgery, the TAVR procedure requires only one small incision, with patients experiencing a **noticeable improvement in symptoms, along with a quicker recovery and less pain**. During the procedure, FMC's specially trained Structural Heart Team uses high-definition imaging to implant an artificial valve within the damaged one, restoring function to the heart.

Physician referral is required for enrollment in the Structural Heart Program. To learn more, call **740-689-4480**.
